INTRO NEW DOCTORS

Dear Friends,

After practicing dentistry in Issaquah for 18 years, my practice has grown so much. I've decided to bring on some new Doctors as my permanent partners to help with the workload. Part of my game plan is to take the next few months off to take care of a few things.

I'm hoping you'll excuse the sudden nature of new people at the office, but I had some urgent healthcare issues come up. That combined with my desire to spend more time with my youngest children in Utah helped me make my decision to step back from clinical work earlier than anticipated.

After a careful search, I was able to hand-pick the right dentist(s) to take over my practice to serve you. She is Dr. Lisa Pan, a caring, talented and compassionate professional, who shares my commitment to exemplary dentistry. From Dr. Pan, I am confident that you will continue to receive the highest quality of dentistry that you have come to expect from me over the years.

Dr. Pan is a graduate from University of Michigan and did her PhD and post-Doctorate training at Harvard School of Dental Medicine. During her schooling she received additional training with special emphasis in endodontic therapy. She is joined by her husband, Dr. Riccardo who graduated from University of Rome School of Dentistry in Italy; thereafter obtaining his advanced degree in Periodontics at University of Michigan School of Dentistry. He is highly skilled in implant placement and special therapy of the gums and surrounding tissues. He is already busy at work fulfilling the implant needs of the people in our community. These two amazing doctors and their two cats Marvin and Yuki, have already moved into our community and have enjoyed exploring the Pacific Northwest.

It is my hope that when you meet them, you'll like them as much as I do. I am confident they will deliver great dentistry with the same Honesty, Compassion and Commitment to excellent care that you deserve. May your life's struggles and daily doings lead you to purpose and joy in work and play. It is the same gift you have given me.

Love ya, mean it ;)

Dr Aaron Wellborn
